

The Status of Women in the Logistics Industry

EDUCATION

WHY? A KEY CONCERN

THE INFLUENCE ...of schools and the industry as a whole is in part to blame for the gender discrepancy. There is a detachment between education and the workplace where women are not necessarily made aware that these great job opportunities exist.

WORKPLACE

Women make up less than 20% of company management positions within the logistics and supply chain industry.

GOOD NEWS THOUGH!

EARNINGS

MEDIAN SALARY

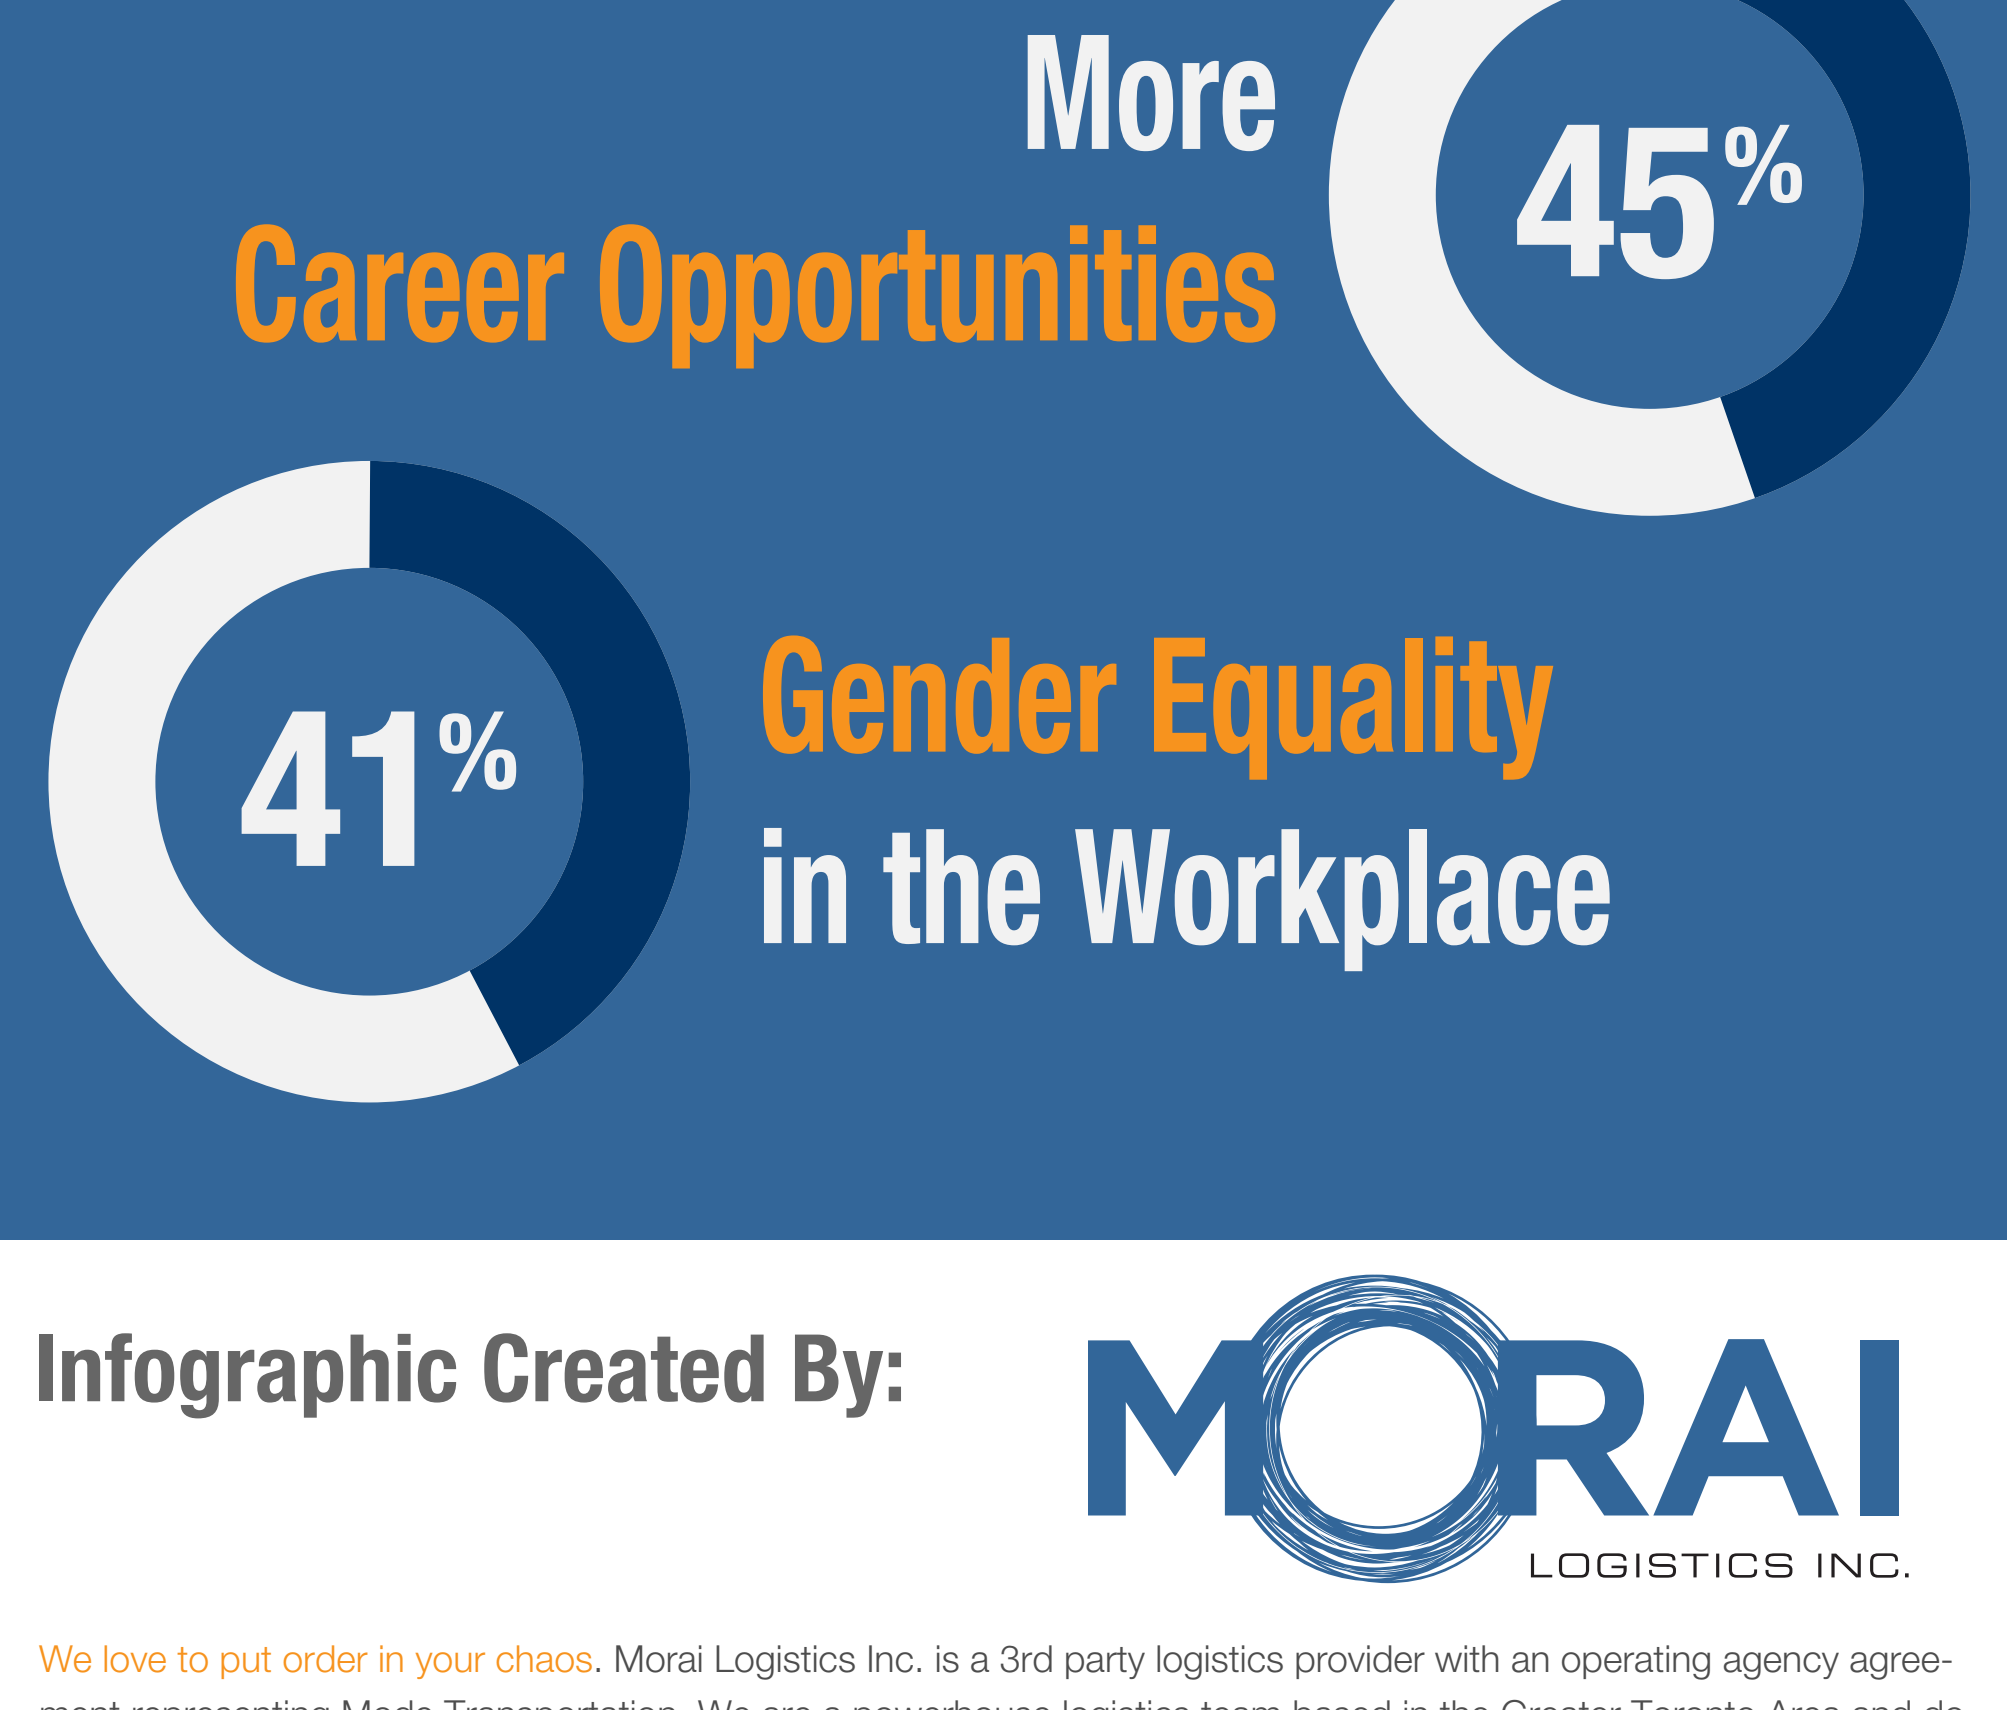

Female professionals in the logistics and supply chain industry earn an average of 20% less than their male counterparts for the same position.
